Part B – Business Case, Project Background / technical issues

B 1 - General

LCC and MBC provide the Wheels to Work Scheme whose aim is to help Leicestershire residents overcome transport barriers which prevent them from accessing or maintaining employment by providing vehicles including motor scooters. This programme has recently been extended through the Leicestershire Sustainable Transport Fund (LSTF) to expand its delivery between 2012-2015. The programme is specifically targeting North West Leicestershire and Charnwood Areas.

LCC has been successful in obtaining £5 million to run the choose how you move transport scheme of which £622,000 has been allocated to Melton to fund the programme. Of this sum £195,000 relates to capital expenditure for the purchase of the scooters to extend the scheme as detailed above. The remaining element of the scheme covers the revenue costs over the period of the scheme. This will enable an additional 100 scooters to be purchased to meet the aims of the scheme.

MBC was asked to put forward a proposal as part of a larger Local Sustainable Transport Fund bid due to the success of running the County-wide Wheels 2 Work scheme.

B 2 –Service / Service / Function

The service forms part of the Place team within Communities and Neighbourhoods

B 3 – Strategic fit

The scheme enables sustain the existing Melton and Rutland Wheels 2 Work scheme which supports the following goals:

- Support people and businesses through the economic downturn
- Improve the well-being of vulnerable people
- Meet the economic needs of the Borough
- Improve quality of life for people living in the most disadvantaged neighbourhoods.

Although the scheme is run primarily in Charnwood and North West Leicestershire, the scheme provides work for local Melton businesses and their staff.

It is expected that the work with employers across the County will help ensure the scheme is sustainable at the end of the scheme in 2015.

Critical Success Factors

- 100 Scooters./electronic bikes purchased
- 480 people directly benefit from the scheme
- Reduce unemployment -85% of those on scheme will have sustained employment
- Deliver scheme in budget
- Identify employers to enable scheme to be sustainable

B 4 - Options appraisal

The County Council has been successful in obtaining £5M towards providing sustainable transport across the overall Choose How You Move project. Melton Borough Council was asked to submit a bid as part of this scheme. This was approved by LCC. The overall bid was successful and approved in June 2012. The Wheels 2 Work aspect of the scheme went live in August 2012. All the funding for the scheme is being provided by LCC. However the scooters will remain assets of MBC at the end of the project.

B 5 - Achievability

The first 20 scooters of the scheme have been purchased and will all be in use by the end of October. All 100 bikes are expected to be in operation by June 2013.

B 6 - Legal Issues (if applicable)

A Memorandum of Understanding has been agreed and signed with LCC.

B 7 Specification

The programme will be open to all groups of unemployed residents living within the target area and its outlying area who are unable to engage in either, employment, training or education due to either restricted or no access to public transport and who live beyond a mile from their destination, therefore excluding them from accessing potential employment.

The scheme will enable the target group to enter into and sustain long-term employment, increasing their life opportunities, improving quality of life, personal health and self-esteem. It is expected up to 480 people will directly benefit from the W2W scheme within the target area by accessing employment, training and education.

The W2W fleet will comprise of electric bicycles, electric scooters and petrol powered scooters of 50 and 125 cc, the 'green' theme will run through the ethos of W2W applicants promoting the benefits of using environmentally

friendly electric vehicles as opposed to the more commonly used petrol versions. The benefits of which will include reduced emissions leading to an improvement in health in those more susceptible to poor air quality as well as promoting cycling as a healthy pastime and an alternative to commuting and reducing congestion.

B 8 - Financial Implications

Cap		
	£	Comment
Initial Costs	2012/13 - £78,000 2013/14 - £117,000	
External Funding	195,000	
Net Cost	0.00	
Ongoing Savings		
Phasing		

B 9 – Project Scoring Matrix

Scoring – for your project – calculate the points			
Criteria	1 Point	2 Points	3 Points
Cost £ (budget, time and human resource)	<£10k	£10k - £50K	>£50K
Timescale	< 6 months	6 – 12 months	> 12 months
Impact if project failed on the organisation	Minor disruption	Moderate	Major
Melton's Track Record	Done Successfully Many Times Before	Done Successfully Once or Twice Before	New Area of Working
Stakeholder Interest (internal and external)	Minimal	Moderate	Major
Project Complexity	Straight-forward	Moderately Complex	Highly Complex

Projects scoring 6 – 10 points - Formal methodology **not** necessary
 Projects scoring > 10 points - Formal methodology **is** necessary

Note

The business case **must** be submitted initially to the Programme Board and will allow schemes to be prioritised and feasibility to be assessed.

Part C – Project Brief

The Project Brief sets out the direction, scope and objectives of the project and forms essentially the “contract” between the Project Sponsor and Project Manager as to what will need to be delivered.

C 1 - Project Objectives, outcomes and benefits

See Appendix A

Part D – Project Management

D 1- Key Business Risks/Contingency Plans/Exit Strategy

- The major risk to the success of the scheme is if the current Wheels 2 Work co-ordinator leaves the post. He has the expert knowledge, contacts and the confidence of the LCC for the successful delivery of the project.

It is essential therefore that MBC retain the services of the current post-holder.

- Ensuring available unit to store and maintain bikes is available
Unit at Snowhill has been sourced for the short-term
- Source of company to provide training to users
CBT trainers in Melton currently being used. Investigating trainers in the Charnwood Area.
- A further major risk is poor client participation
- Ensure proactive promotion of the scheme continues throughout the projects lifetime
- ■ Ensure vehicle reliability and quality remain unimpaired

As part of the overall Choose How You Move Scheme, a number of the providers have formed a group to work with employers in the region. This work will be part of the exit/sustainable strategy to work with major employers –such as Caterpillar, east Midlands Airport, Job centre Plus- to provide ongoing support for the scheme if funding to extend the scheme in 2015 is not found. The scheme is also looking at the charging scheme to analyse if this can also make the scheme self-funding.

D 2 - Key Stakeholders

This section should identify the key stakeholders, both internal and external to Melton Borough Council, for example:

External Stakeholders

- Leicester County Council as funders of the project
- Major employers in the County
- Job Centre Plus
- Educational Establishments
- General Public – LCC and MBC are jointly promoting the scheme to the public. Users on the scheme get a regular newsletter providing information and support – i.e. – How to drive safely during the winter.
- LCC communications department are providing the majority of the resources to publicise and promote the scheme including to the broadcast media.

Internal Stakeholders

Finance – An internal group has been set up with finance. Discussions include raising and paying of invoices, insurance and with the service accountant.

Financial Support – As this is an extension of the existing scheme, relationships have been built up with the Finance Support section who will recover non-payment of invoices raised.

Legal – The M.O.U was approved by legal section. The legal section are also used to taking court action in this area.

For guidance on their management strategies refer back to Step 2 – Prioritisation, page 16

D 3 - Communication Plan

The Communications Plan will have been developed from information derived from Stakeholder Analysis, Project Brief, and Directives from the Programme Board, Project Quality Plan and Project Approach.

The PM has regular meetings with the Project Sponsor and monthly meeting are help with LCC as funders of the scheme and who have to provide reports to DCLG.

Information around progress against targets for uptake, budget and users is also provided.

It is intended that the PM provides a quarterly update to the programme board on progress.

Regular meetings with project suppliers to ensure continued quality of delivery and reliability

Regular articles will be placed in the Corporate Messenger to inform staff on progress of the scheme.

D 4 - Project Controls

This section of the PID should highlight the key controls that have been put in place to aid the management of the project. This may include:

Quality Control

- Information is gathered on the users access to own transport after their 6 months usage of the scooter
- Information on if education or employment is being enabled by the use of the scooter
- Information on whether the user remains in education or employment
- Ethnicity Information on the users of the scheme
- Budgetary information

Key Controls for Project Closure

- Engaging with employers to make the scheme sustainable after 2015
- Evaluation of the success of the scheme to secure future funding
- Evaluation of charging policy to make the scheme self-sufficient

Appendix B2, – Standard Risk Management Template

Project Name:

Updated:

Col 1	Col 2	Col 3	Col 4	Col 5	Col 6	Col 7	Col 8	Col 9	Col 10	Col 11
Risk No.	Grade [red, amber, green]	Risk Owner	Cause	Potential Consequences	Current Score	Original Score	Movement [↔,↑,↓]	Current controls [working]	Adequacy of mitigation measures	Planned actions (For key risks only)
1				•						
2				•						
3				•						
4				•						
5				•						

Last updated:

Risk Number	This is the unique identification number given to each individual risk
Owner/project	Who is the risk owner and therefore responsible for ensuring the mitigation work is undertaken
Cause	This describes the existing, potential or perceived risk/threat to the project objectives
Consequence	The impact of the cause is often a chain of events that can impact on many stakeholders
Current score and original score	Based on the risk matrix, how is the risk likelihood scored e.g. A, B, C, D or E Based on the risk matrix, how is the impact scored e.g. 1, 2, 3 or 4 The original score is as per the first time it was raised.
Current mitigation	The existing measures that are in place to control /prevent the risk (risk mitigation)
Adequacy	An assessment on the suitability of the current mitigation measures (adequate, poor, good)
