Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

			Policy	y SS4 – Melton Mowbray South Sustainable Neighbourhood		
Name	User ID	Do you support this policy? - Opinion on SS6	Issue or comment	What changes would you like to see made to this policy? - Comments	Officer Response	Proposed Amendment
Russell Collins	ANON- BHRP- 4HZW- S	Support	This development is well located and the stretch of ring road produced will be well used. This is a cut through from Leicester Road to Burton road at present.	Eliminate development outside the proposed ring road to reduce traffic conflicts.	Noted.	
Robert Ian Lockey	ANON- BHRP- 4H3G- 2	Support	This is what a plan ought to be about; doing the necessary to create or develop a community. In this case, given the congestion in Melton town centre, I can support measures to reduce dependence on cars.	There is a need for cheaper housing. Exceeding 'building regulations for energy efficiency and carbon emissions' and general overspecification of houses should be a lower priority than affordability.	Noted.	
Angus Smith	ANON- BHRP- 4HZK- D	Support	Nicely thought out to provide for housing and develop a community edge to the town, whilst delivery the well needed element to the town bypass.	Identify what will be put in place under traffic management to protect the surrounding villages from the increased traffic burden. The villages being, Burton Lazars, Great Dalby, Eye Kettleby and Kirby Bellars. Kirby Bellars is the only village actually placed across the main trunk road that runs between Melton and the M1south - increased habitation means increased traffic through this area which is difficult at present. Traffic management and mitigation needs to be incorporated as part of the overall plan	Noted.	
Mr John Brown	ANON- BHRP- 4H4Z-P	Object	Melton Mowbray has never had a Travellers' site, so why propose 3. Surely it would be best to try 1 and see how the community reacts. Some travellers are very law abiding, respectful people and others are not. If the first site is not accepted, then what would make you think that another 2 would be? A lot of discretion will be needed for this, otherwise a whole community (perhaps long standing) could be ripped apart.	See above. The environment should be protected at all costs. We only have one shot at this. Once it's gone, it's gone forever.	The need for Gypsy and Traveller (G&T) sites has been informed by the Leicester and Leicestershire G&T Accommodation Assessment. A site has been identified as part of the SUE because it will help to create mixed and balanced communities, it is in a sustainable location and is deliverable.	
Siobhan Noble	ANON- BHRP- 4HED- H	Support	Although vast, I suspect over time this could enhance the lifestyles of those areas affected like Burton Lazars and Eye Kettleby.	The roads concern me, I don't understand the phase at which the ring road is added. I would like to see this earlier in the plan to avoid the congestion that Melton suffers without the additional population.	Noted. The policy and proposals map promotes an 'outer relief road' which links the A606 to the A607. The detailed design and alignment will be determined through development of detailed planning applications and	

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

Dr Leonard Richard Newton	ANON- BHRP- 4HET-1	Support with observatio ns	Development should make full use of brown field spaces e.g. the old airfield site.	None.	liaison with the Local Highway Authority. It is unlikely that the relief road would be delivered in advance of housing development, but would be part of a phased delivery to be agreed through a submitted masterplan and phasing plan. The 'old airfield' site was allocated in the Melton Local plan and has not resulted in delivery of housing or associated infrastructure. There are currently no active promoters of the site and it is therefore not considered deliverable during the plan period. The Melton South Sustainable Neighbourhood is considered a more sustainable and deliverable solution. The NPPF encourages the use of Previously developed (brownfield) land generally.	
Anthony Thomas	ANON- BHRP- 4HFX-6	Support with observatio ns	Only will support the above if numbers of houses quoted and conditions outlined above are strictly adhered to.	None.	Noted. It is the intention to identify am enforceable policy.	
Mark & Kathryn Chapman	ANON- BHRP- 4HFJ-R	Support with observatio ns	It would help support the shift away from the use of cars if the existing footpath from Burton Lazars into Melton was widened and moved away from the edge of the A606, possibly with a cycle lane too. Councillors should try walking along that section. It's frightening. Also suggest a 30mph limit along this section to further improve safety and reduce traffic as sat navs find alternative faster routes. If Melton seriously wants to address traffic levels in the Town at peak times levels a new secondary school is needed to the south of Melton. Too many children are being bussed or driven in private cars to Oakham or across town to John Fernley.	The existing map shows development areas on both sides of the southern relief road. Housing development should not be allowed to spill over to the south of the southern relief road. The zone of separation between Burton Lazars and the South Sustainable Neighbourhood should be more clearly defined with marked boundaries. The existing "green squiggle" on the map is far from clear. Very concerned that the Southern Relief road will attract through traffic to the area as Sat Navs identify a faster route. This will increase traffic levels on the A606 through Burton Lazars where some houses are very close to the road. Speed limit through Burton Lazars must be reduced from 40mph to 30mph.	Noted. This is a matter of detailed design that can be considered through masterplanning and determination of a planning application. The capacity of local secondary schools will be considered as part of the associated infrastructure delivery plan.	
John	ANON- BHRP-	Support with	1) The Figure which accompanies draft policy SS4 shows areas of housing development to the south of	1) The Figure which accompanies the policy should not be shaded for Proposed Residential below the line of the	The Melton Mowbray South plan is for illustrative purposes. Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

			will set an unfavourable precedent and encourage further development towards Burton Lazars and Eye Kettleby in the future. It is controversial to state that the SSN will create an 'improved urban edge'. This is purely a matter of opinion as this development could indeed be seen as destroying the 'urban edge' of the town. It also seems a contradiction in terms to state that SS4 will relate 'sympathetically' to Burton Lazars and Eye Kettleby and will prevent the coalescence of Melton with these two villages (EN4) when in fact it threatens to do just that. The individuality of these villages should be respected and upheld.		housing south of the proposed link road as this could form a strong defensible boundary. It currently reflects the extent of the proposed site promoted through the Council's SHLAA which often reflect land ownership. Detailed masterplanning will set out proposed land uses. It is accepted that the proposal would move development closer to Eye Kettleby and Burton Lazars. However, the plan seeks to retain a separation area between settlements that will help to protect their separate identities and character. Parts of the southern edge of Melton Mowbray could be improved by creating a high quality 'active edge' to the built area. Policy SS4 and policy D1 seek high quality design solutions.	
Environm ent Agency	ANON- BHRP- 4HFU- 3	Support	We fully support this policy especially in relation to the protection and enhancement of wildlife corridors, new corridors incorporating watercourses and Melton Country Park and the protection zone between any future development and the River Eye SSSI.	We support this but would like to add the following to the section on the environment. "The redevelopment of brownfield sites is encouraged. Contamination issues must be addressed and the local water environment should be protected." This area is underlain by superficial deposits including the Oadby Member (secondary undifferentiated), sands and gravels (secondary A) and colluvium (secondary B). The bedrock geology of this area is the Blue Lias which is classified as secondary undifferentiated. See above for an explanation of these definitions.	Noted. The NPPF already encourages the use of Previously developed (brownfield) land generally and protecting the water environment from pollution	
John A Herlihy	ANON- BHRP- 4HU3- G	Other	We do recognise that to have a 'plan' somebody has to start out with well written proposals. So - that's what you have a given us. Again - All very laudable aims / aspirations	You say - A strategic road link connecting the A606 to the A607 Leicester road forming part of the Melton Mowbray outer western relief route as part of a wider agreed scheme; WHAT AGREED SCHEME??? IT is surely only a proposed relief route link. Have you lot already decided that Melton will not get a ring road / by pass AGAIN - nobody is looking at the entire picture.	Noted. The Council's transport assessment considers the impact of the proposed Melton South SN on the local (and wider) road network. The evidence currently assembled indicates that the transport mitigation measures proposed alongside the development would

					Model provides the best available evidence to understand the transport impacts and implications of development.	
Craig	ANON	Ohiost	This chapter makes reference to the Courth of Moltan	None	The man on page 44 refers to the	
Craig Heaney	ANON- BHRP- 4HUY- P	Object	This chapter makes reference to the South of Melton and yet the first map illustrates the area to the North of town and the deficiency that I have pointed out earlier with regard to the link road ending at Melton Spinney Road rather than being extended to meet the Grantham Road at a position north of Thorpe Arnold.	None	The map on page 44 refers to the Melton South SN.	
Moira Hart	ANON- BHRP- 4HU7- M	Support	It makes sense that development in and around Melton Mowbray should be on a larger scale because it has an existing infrastructure, the jobs and the transport system. This will allow sustainable development and environmentally friendly travel to town and neighbouring cities.	None	Noted.	
Christine Larson	ANON- BHRP- 4HUU- J	Support	A suitable sustainable development that takes account of existing infrastructure and links to Leicester and other cities.	None	Noted.	
Moira Hart	ANON- BHRP- 4HBM- Q	Support	It is logical that development around Melton Mowbray should be on a large scale to take account of the existing infrastructure, the jobs and the transport system. This will allow sustainable development and environmentally friendly travel to town and neighbouring cities.	None	Noted.	
Susan Herlihy	ANON- BHRP- 4HE3-Z	Support	Includes provision for education, protection of village identities	None	Noted.	
Deborah Caroline Adams	ANON- BHRP- 4H38-K	Object	It would not be sustainable as its sustainability is reliant on a southern outer relief road being built from the A607 Leicester Road to the A606 Oakham Road. This outer relief road would need to be of a high enough standard to take HGVs and not be the	The whole thing should be shunted on to the old Melton airfield and a new village created which would be far more sustainable with its own shopping, health and primary education amenities which would make it independent of Melton.	Noted. The policy and proposals map promotes an 'outer relief road' which links the A606 to the A607. The detailed design and alignment will be determined through development of	

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

Anthony	ANON-	Object	The required funding for the outer relief road which is part of a proposed Melton Mowbray bypass cannot be met by developers alone without other infrastructure funding being reduced significantly particularly if MBC insist on 37% affordable housing. Without the funding for the outer relief road, the road will not be built and so the southern SUE cannot be sustainable. It should therefore be refused "on transport grounds where the residual cumulative impacts of development are severe." (NPPF point 32).	Justify the so-called identified "needs". At present, these	a detailed planning application. Any proposed road must meet the specifications and requirements of the Local Highway Authority. Any new road would need to be of sufficient dimensions to accommodate HGVs. The infrastructure requirements of the South Melton SUE and the viability of these will be assessed in order to demonstrate deliverability. The scale of development is required	The final policy should set out in more
Paphiti	BHRP- 4HBV- Z		of intended houses and the scale of development is frightening. The result will be a sprawling conurbation that will change for ever the nature and character of the town. In addition, the building of link road connecting the A606 and A607 will a. bring a large volume of traffic close to quiet rural areas; b. increase the level of pollution from those vehicles; c. increase noise levels; d. provide an excuse for housing in-fill which will result in even greater housing expansion out towards the Rutland county border	are figures that seem to be plucked out of thin air. Produce persuasive evidence of the sort of businesses that are willing to re-locate to Melton Mowbray and the number of employees likely to be attracted here as a result. This plan will merely suck in house buyers from outside the town egg from Leicester, who want a more rural location (but will still commute to work in Leicester) rather than meet the local needs of the community and business.	to help meet the Council's housing requirements in a sustainable location. The quantity of growth will help to support the delivery of the proposed link road, new schools and other infrastructure. Large scale growth can deliver a quality development provided that there is a satisfactory masterplan and high quality design. Other policies in the plan seek these outcomes. It is accepted that the proposed development has the potential to increase the amount of traffic. Mitigation measures are proposed in order to address any adverse impacts.	detail the mitigation measures required in order to mitigate impacts, or the policy should specify that a detailed package of transport measures, including a costed phasing plan, should be submitted in advance of determining a planning application.
Clair Ingham	ANON- BHRP- 4HMZ- F	Support	Seems reasonable with the inclusion of some housing to meet everyone's needs and more facilities such as retail developments, schools & medical centres to cope with the increase in population as well as providing relief roads and reducing the amount of cars by providing walking and cycle routes and green spaces	If development land for industry is to the south of Melton then affordable housing in villages should also be considered south of Melton, negating traffic through the town centre and reducing distances travelled.	Noted.	
Melanie	ANON- BHRP-	Support with	Development to the south of Melton. Service	If development land for industry is to the south of Melton then affordable housing in villages should also be	The distribution of development should not all be to the south of	

Steadman Laura Smith	ANON-BHRP-	observatio ns Support with	centres to the North. Regarding energy efficiency and building design, I would like to see a requirement for new industrial	considered south of Melton, negating traffic through the town centre and reducing distances travelled. None	Melton Mowbray. Development in other locations is required in order to meet housing need and support local services and facilities. Policy EN9 seeks to promote energy efficient buildings.
	4HB7-1	observatio ns	premises to install solar panels on roofs. Also, new build dwellings should incorporate solar panels into the design.		
Russell Pride	ANON- BHRP- 4H6H- 6	Object	Policy SS4 – South Melton Mowbray Sustainable Neighbourhood (Strategic Allocation) - Transport Policy SS4 - South Melton Mowbray Sustainable Neighbourhood - Transport. Policy SS5 - Melton Mowbray North Sustainable Neighbourhood - Transport Page 26: Fig.4 Emerging Options (Draft Plan) key diagram Maps on pages 43 (North) and 49 (South) Sections 4.3.6 and 4.4.4	I find it extraordinary that the proposals planned for the next 20 years for North and South are not properly linked together. I see no logic in proposing a scheme of bypasses that have no direct connectivity between the East and the West, but are instead left just "hanging". Action: These issues must be addressed and resolved before the plan is sent for government approval.	The policy and proposals map promotes an 'outer relief road' which links the A606 to the A607 and provides improved links between the northern and southern SNs. The detailed design and alignment will be determined through development of detailed planning applications and liaison with the Local Highway Authority.
Christoph er Fisher	ANON- BHRP- 4HM2- 7	Support with observatio ns	In terms of transport, I am not clear what happens to traffic coming from Oakham once it reaches the A607. This seems only sensible if there is a by pass from the A607 to the A6006.	None	The final version of the Local Plan will contain details of the proposed alignment of the relief road. The impacts on vehicle flows will be considered in the transport assessment.
Robert Anthony Fionda	ANON- BHRP- 4H13-C	Support with observatio ns	Bypass urgently required (like yesterday) to avoid gridlock to the town.	None	The Local Plan seeks to secure a relief Road and other mitigation measures to address transportation issues in Melton Mowbray town centre.
Wayne Hickling	ANON- BHRP- 4H1R- B	Object	Traffic surveys suggest that the northern by-pass will bring most relief to town centre congestion as there are more main roads and services north of the river Wreake. The southern by-pass route would have a negative impact on Burton and Dalby from the very beginning.	Housing development to concentrate to the north of Melton first.	Transport assessments will inform the preferred route of the relief roads around Melton Mowbray. The transport impacts north and south of the town will be assessed.
Bottesfor d Parish	ANON- BHRP-	Support with	Supported with observations and evidently some way on in planning.	The policy whereby all supported commercial development is to be located in Melton Mowbray	Noted. West of Melton Mowbray is not the preferred strategic approach

Bottesfor d Parish Council	ANON- BHRP- 4H1W- G	Not Answered	- supported with observations and evidently some way on in planning.	The policy whereby all supported commercial development is to be located in Melton Mowbray surrounding villages is fully supported as the most sustainable option. Rather than leave the western development (MOD Animal Centre SS6) as a fall back, start the planning now for development to take place within the Plan period. This additional development may aid the	Noted. West of Melton Mowbray is not the preferred strategic approach as there is no single site promoter at present and viability or deliverability is more uncertain. It is one of a number of options if the preferred strategy is not successful.	
John Rust	ANON- BHRP- 4HUV- K	Support	Extract: It is logical that development around Melton Mowbray should be on a large scale to take account of the existing infrastructure, the jobs and the transport system. This will allow sustainable development and environmentally friendly travel to town and neighbouring cities.	Extract: A suitable sustainable development that takes account of existing infrastructure and links to Leicester and other cities.	Noted.	
G.E.Digby	ANON- BHRP- 4H1A-T	Object	The building should commence further away (1-200m) from the A606 to retain the current small area of separation between the Melton and Burton boundaries. The two boundaries are only some 400m apart. I see no vehicle impact assessment on the villages of Great Dalby and Burton Lazars	A stated commitment that the area between the settlement of Burton Lazars and the proposed ring road will not be encroached upon to ensure the character of the settlement is retained. This area of separation must be guaranteed for the term of the plan	Distance separation between Burton Lazars and the proposed Melton South SN will be determined through a masterplan and determination of any subsequent planning application. It is important to maintain separation of the settlements. The extent of the separation will be informed by landscape and other considerations.	
Colin Love	ANON- BHRP- 4HBR- V	Support	That these should be allowed only on the condition that they can demonstrate that they contribute to Melton's identified local housing needs. That is to say, they should not be for the building of substantial 'executive' houses for people wanting to have the benefit of living in villages whilst then undertaking substantial commuting journeys to work. Thus they should provide smaller, two or three bed houses and bungalows for local residents	Unsure of the intended housing details - I would like to see that the proposals include Local Authority housing to rent - including bungalows. I would like to see a reversal to the 40% so-called 'affordables'. The new development, Its totality, should have sufficient 'green' planting - trees and hedges - to absorb the inevitable increase in vehicle pollution. This will require a full scientific investigation to achieve the objective. Great care should be taken to ensure that any industrial development is required to be in an attractive building style and materials (not the cheap fabrications) - with appropriate greenery. Industry can be made an attractive addition to the architectural scenery of the Borough - not blots on the landscape.	The policy seeks to ensure that there is an appropriate 'mix' of housing including affordable housing. This is also addressed in policies C2 and C4 of the emerging Local Plan.	
Anthony Edward Maher	ANON- BHRP- 4HUS- G	Support with observatio ns	This does have the potential to deliver a functional section of bypass / relief road between major routes. The completion of this and hence a functional section of road would be beneficial but I	None	Delivery of the relief road in advance of the housing is not likely to be financially viable. Transport modelling will help to identify any	

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

Mick Jones	ANON- BHRP- 4H6N- C	Support with observatio ns	feel the completion should be in advance of the completion of all of the housing. As I stated in Chapter 4 this may require other funding which should be obtained before the development is started. It is also a link to the industrial area. WHY HAS THIS OF BYPASS SCTION NOT HAVE A PROPOSED COMPLETION DATE AS OTHERS?? I have reservations about the effectiveness of the link roads north and south. There also appears to be no allocation of employment land in the north development area.	Complete the link road in the east and west sectors, reduce the depth of development in the north and south.	necessary mitigation measures that will help to limit adverse transport impacts in advance of completion of the relief road. The agreed phasing of the relief road will be considered as part of an agreed masterplan. Noted. No specific deliverable development sites have been identified to the east and west of Melton Mowbray. The alignment of the relief road to the east has not been finalised.
Alison Thurley Burton & Dalby Parish Council	ANON-BHRP-4HGG-P ANON-BHRP-4HU6-K	Support with observations Support with observations	Only support if there is a full outer relief bypass for Melton and traffic calming measures for residential areas. The proposal extends into two Areas of Separation. Why has the Eastern Sustainable Extension (MBC.049/13) been rejected? The map indicates that development extends to the south of the Relief Road. There should be consideration of the impact of traffic generated by the SSN on the villages of Burton Lazars and Great Dalby.	The indicated Relief Road should effectively form the southern boundary to the Neighbourhood, with no development indicated south of the Relief Road. "Measures to mitigate the impact of development on the existing transport network where adverse impacts are identified" should be replaced by "Measures to ensure that the development does not adversely impact on the existing transport network".	The Local Plan seeks to support delivery of a relief road for Melton Mowbray that will address the main traffic issues in a deliverable manner. It is not proposed that this is a full ring road. Noted. The Eastern sustainable extension was not preferred because it was not able to deliver the required quantity of development and, if developed independently, was unlikely to be able to provide associated infrastructure such as a primary school. The Melton Mowbray South plan is for illustrative purposes. It is not proposed that there would be housing south of the proposed link
					road as this could form a strong defensible boundary. It currently reflects the extent of the proposed site promoted through the Council's SHLAA which often reflect land ownership. Detailed masterplanning will set out proposed land uses. It is important to maintain separation of

					1111111111	

					the A606).	
Mark Brend	ANON- BHRP- 4HGD- K	Support with observatio ns	A well thought out increase to the scope of the Melton Mowbray built up area.	None.	Noted.	
Robert	ANON-BHRP-4HGP-Y	Object	Until a full ring road round Melton is a feasible option the proposed link from the A606 to A607 will only serve to move the pinch point of traffic into Melton Town centre and encourage increase traffic on the B6047 through the outlying villages. Housing development must be within any proposed ring road otherwise it leaves open the ability to easily encroach onto the green belt to the detriment of the conservation village of Great Dalby.	A comprehensive plan for a complete ring road round Melton to reduce traffic flow through the town centre with housing development within the ring road.	Delivery of the relief road in advance of the housing is not likely to be financially viable. Transport modelling will help to identify any necessary mitigation measures that will help to limit adverse transport impacts in advance of completion of the relief road. The agreed phasing of the relief road will be considered as part of an agreed masterplan. The Melton Mowbray South plan is for illustrative purposes. It is not proposed that there would be housing south of the proposed link road as this could form a strong defensible boundary. It currently reflects the extent of the proposed site promoted through the Council's SHLAA which often reflect land ownership. Detailed masterplanning will set out the extent of proposed land uses.	
Elizabeth Ann Johnson	ANON- BHRP- 4HGR- 1	Support with observatio ns	 I am concerned about the impact of traffic generated by this development on the villages of Burton Lazars, Great Dalby and other villages to the south. When considering the Southern Sustainable Neighbourhood the impact of traffic on Melton town was considered. There is no evidence that the traffic impact on the villages to the south of Melton was assessed. I am concerned about 'creep' into open countryside and the 2 adjacent Areas of Separation. It is important to respect the individual identity of Burton Lazars and Eye Kettleby as separate 	1) The impact on villages to the south of traffic generated by the SSN should be addressed under Transport. 2) The relief road should form the southern boundary with no housing allowed to the south of it. This should be indicated on the South Melton map.	The Council has commissioned Transport Assessments using the Leicester and Leicestershire Integrated transport Model to assess the impacts of development proposals on the Borough (including the A606 at Burton Lazars). The Melton Mowbray South plan is for illustrative purposes. It is not proposed that there would be

			from this development for both indoor and outdoor sport? This is not clear? Is it in the right location? The LP chooses to adopt standards for playing field provision which is not supported by Sport England (clear site specific proposals being preferred and identified in policy, clearly linked to planned development proposals - in terms of its scale and location, and identified in the IDP or CIL charging schedule). If the PPS has identified deficiencies in pitches for example (which there appears to be for football according to par. 7.13) where are these deficiencies located and in what location are they to be met? Should sports pitches - and if so what type of pitch, how many etc be provided as part of the masterplan exercise? It is not clear how the BFS or PPS have informed this policy/allocation and what is needed to be provided by this specific development and where? The IDP mentions some sports provision but it is not clearly linked to the allocations, there is no clear linkage with the		required towards the new Sports Village where necessary and reasonable. It is envisaged that the more detailed masterplanning work will help to provide greater detail and clarity on the type of play and open space facilities that will be provided within the Melton South SN.	
Mary Anne	ANON- BHRP-	Other	allocations, there is no clear linkage with the BFS/PPS and those facilities are listed as 'desirable' (not essential) even though in principle there is an evidence base demonstrating their need to deliver the vision/strategic objectives for health improvements? I think the ball has to start rolling somewhere.	None	Noted.	
Donovan	4HUR- F					
Martin Alderson	ANON- BHRP- 4HHU- 5	Support with observatio ns	This development must not proceed until a proper ring road is up and running.	None	Delivery of the relief road in advance of the housing is not likely to be financially viable. Transport modelling will help to identify any necessary mitigation measures that will help to limit adverse transport impacts in advance of completion of the relief road. The agreed phasing of the relief road will be considered as part of an agreed masterplan.	

Christoph er John Noakes	ANON- BHRP- 4HBK- N	Support with observatio ns	As commented elsewhere, an increase in the overall provision of housing within the Plan period (at MM) would improve the achievement of sustainable objectives. No comments on the detailed provision of the Plan	Any potential to increase the overall number of new dwellings, without compromising the separation of MM from Burton Lazars and Eye Kettleby and containing the development of the town below the higher ridge to the south? Para 2 of pre-amble: Is it not possible to achieve the full complement of 2000 homes in the Plan period? e.g. by sub-division of allocations to more developers. This might well secure a completion rate in excess of the 100/year identified in para 4.6.2	Noted. The housing delivery trajectory in the final plan will seek to provide realistic delivery rates. 2,000 houses during the plan period would be difficult to achieve given 'lead-in' times and annual delivery rates. 100 houses per year is considered realistic.
Gwynnet h Whitehou se	ANON- BHRP- 4HH7- 7	Object	I do not see evidence of the impact of traffic associated with development in South Melton on the villages to the south.	The southern relief road as shown on the plan should be the outer limit of the development to the south of the town.	The Council has commissioned Transport Assessments using the Leicester and Leicestershire Integrated transport Model to assess the impacts of development proposals on the Borough including as a result of the proposed Melton South SN.
The Freeby Estate & Various other Landown ers	ANON- BHRP- 4HHC- K	Support with observatio ns	Support both North & South SUEs in order to secure a relief road which links north, south and west but with reduced housing over the term of the plan but total number of 30-40 years.	None.	Noted. The overall housing need (245pa) and plan period (2036) reflect the Objectively Assessed Need for Housing evidence.
Anthony Barber	ANON- BHRP- 4H6R- G	Support with observatio ns	Still unclear why the brownfield Great Dalby airfield site has been ruled out.	None.	The 'old airfield' site was allocated in the Melton Local plan and has not resulted in delivery of housing or associated infrastructure. There are currently no active promoters of the site and it is therefore not considered deliverable during the plan period. The Melton South Sustainable Neighbourhood is considered a more sustainable and deliverable solution.
Stephen onathan Gaylor	ANON- BHRP- 4HHE-	Support with observatio	Lack of evidence that the impact of traffic on the southerly villages of Eye Kettleby, Burton Lazars & Great Dalby has been assessed and considered in this policy. The increased volume of traffic created	See comments.	The Council has commissioned Transport Assessments using the Leicester and Leicestershire Integrated transport Model to assess

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

	N	ns	by the proposed development will not be sufficiently alleviated by the relief road. This is because it will only provide a partial by pass of the town as the full ring road will remain incomplete for the foreseeable future. The afore mentioned villages could therefore be subjected to significant rises in volumes of traffic travelling to and from the development while attempting to avoid the town centre which is already over burdened and regularly congested at peak times. The link road will just push any congestion further round the town.	the impacts of development proposals on the Borough (including the southerly villages of Eye Kettleby, Burton Lazars & Great Dalby).
			If the development goes ahead it should NOT be allowed to creep beyond the proposed southern relief road as indicated in yellow on the map. This will set an unfavourable precedent and encourage further development towards Burton Lazars and Eye Kettleby in the future. It is controversial to state that the SSN will create an 'improved urban edge'. This is purely a matter of opinion as this development could indeed be seen as destroying the 'urban edge' of the town. It also seems a contradiction in terms to state that SS4 will relate 'sympathetically' to Burton Lazars and Eye Kettleby and will prevent the coalescence of Melton with these two villages when in fact it threatens to do just that. The individuality of these villages should be respected and upheld. The relief road should be incorporated in to a full ring road/bypass for Melton Town centre. If the development goes ahead it should NOT be allowed to creep beyond the proposed southern relief road as indicated in yellow on the map. this should remain strictly bordering the most easterly edge of the development.	The Melton Mowbray South plan is for illustrative purposes. It is not proposed that there would be housing south of the proposed link road as this could form a strong defensible boundary. It currently reflects the extent of the proposed site promoted through the Council's SHLAA which often reflect land ownership. Detailed masterplanning will set out the extent of proposed land uses. It is important to maintain separation of the settlements. The extent of the separation will be informed by landscape and other considerations.
L J Hyde	BHLF- BHRP- 4H23- D	Support with observatio ns	I strongly object to any new housing development to the south of Melton until the following are in place: a. Bypass b. Local amenities to include schools and Doctor's Surgery. c. Large supermarket The consequences of not having these in place would mean even more traffic using Mill Street/Regent Street/Brook Street as a rat run for every journey into town. The majority of drivers will not walk, cycle	Delivery of the relief road, schools and Doctor's surgery in advance of the housing is not likely to be financially viable. Transport modelling will help to identify any necessary mitigation measures that will help to limit adverse transport impacts in advance of completion of

			much later on to the Leicester Road. 4. The amount	
			of traffic on the Burton Road is already 'critical', but	
			unless the link road is built first the situation will	
	1	1	I	1

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

	become significantly worse until 2036. 5. When the A1 is closed between Grantham and Stamford the traffic is constant throughout the day and night and it is impossible to get out of Lime Street, Child Close, New Road or Cross Lane - in order to get into Melton, drivers have to take the single track road to Stapleford and enter Melton via Saxby Road. The A1 has been closed nearly 100 times in the last 2 years. 6. The road traffic situation is dreadful and dangerous. Please do not make it worse.			
Yvonne Lesleina Rowe 4HQP-99	The proposed plan encroaches on area of separation between Melton and Burton Lazars and would encourage "town creep" into the village. Increased traffic and its impact through Burton Lazars has not been assessed. Serious accidents and risk to residents turning right onto the Melton road is high, especially at peak times. High density housing at this southern side of Melton threatens the rural, open landscape and the nature and character of rural villages and the setting of the scheduled ancient monument of Burton Lazars leper hospital	STOP! The south route for development of roads and housing on this scale. The northern route was already identified as a more suitable route and building has already begun on that side if the town. KEEP Burton Lazars individual identity as a separate community in open countryside	The proposal seeks to maintain the individual identities of Melton Mowbray and Burton Lazars by retaining a gap between the settlements, the extent of this separation will be informed by an assessment of the landscape, topography and other considerations and will be reflected in the masterplans in advance of planning applications being considered. The Council has commissioned Transport Assessments using the Leicester and Leicestershire Integrated transport Model to assess the impacts of development proposals on the Borough (including the southerly villages of Eye Kettleby, Burton Lazars & Great Dalby). The density of any proposed development will be a matter for detailed consideration as part of any planning application. The Council is working with its partners at Historic England to ensure that any proposals can be implemented without substantial harm to the designated asset.

	establishment of the Knights of St Lazarus in England	development that encourages
	and is of exceptional archaeological and historic	tourism. The Council will continue to
	importance (even amongst monuments of	work with its partners at Historic
	designated on the basis of national archaeological	England to ensure that any proposals
	importance). Whilst noting the case for the utility of	can be implemented without
	a southern bypass, it is not considered there is any	substantial harm to the designated
	capacity for residential development to the east of	asset.
	Dalby Lane in order to protect the significant	usset.
	Scheduled Monument in its agrarian landscape	The proposed masterplan will help to
	setting consciously at a distance removed from the	establish the satisfactory extent of
	town. If this opinion is to be pursued, the bypass	development in the context of the
	(Outer Western Relief Route) and associated	SM.
	landscaping should be sited as far north of the	
	scheduled monument as possible, there is not	
	sustainable capacity to include housing as well as	
	bypass in this zone. I would also refer to Tim Allen's	
	letter of 16 February 2016 in relation to application	
	15/00127/OUT. If a bypass is taken forwards with	
	plan led housing growth to the south of the town on	
	the basis of weighting public benefits, then harm to	
	the significance of Burton Lazars scheduled	
	monument should be minimised as set out in the	
	NPPF giving great weight to the conservation of this	
	nationally important designated heritage asset. The	
	bypass route should form a limit to housing	
	development, i.e. dwellings should not be	
	constructed on its southern side. A bypass route	
	avoiding substantial harm to the monument's	
	significance might be constrained as follows: Such a	
	route could run from a junction north of Valley	
	View/Aerodrome Farm on the Dalby Road (thereby	
	preserving the pastureland and earthworks to the	
	south). It could then head east-north-east to follow a	
	natural hollow crossing Sandy Lane at a point no	
	more than 200m south of the Kirby Lane/Sandy Lane	
	junction. A route might then follow the natural dip in	
	topography east-north-east to cross the next field	
	boundary and take a line east to meet the Burton	
	Road. A junction with the Burton Road could lie	
	south of number 222 Burton Road but should avoid	
	crossing the existing field boundary to the south-	
	east of that field. Although welcomed, reference to

			southern SUE are better. For all the above reasons,	
			the Core Strategy proposal for a northern SUE is not	overall housing requirements have
			sustainable and cannot be supported. The Core	increased resulting in the need for
			Strategy is therefore fundamentally unsound as the	Urban Extensions to both the north
			evidence base does not support the strategy –	and south of Melton Mowbray to be
			paragraph 182 of the NPPF refers." The Inspector	considered.
			therefore considered development directed to the	
			south of Melton Mowbray would be better-related	
			to the existing and proposed areas of employment,	
			the town centre and the railway station.	
			Gladman are supportive of the allocation of 2,000	Noted
			homes to the South Melton Mowbray Sustainable	Noted.
			Neighbourhood. Gladman have a current planning	
			application pending determination (Ref	
			15/00910/OUT - See Appendix 2) for part of the	
			Strategic Allocation which can be brought forward in	
			the short-term. The Gladman application site	
			represents a logical rounding off of the current	
			settlement, adjacent to a key employment area and	
			within a short distance of the town centre; clearly a	
			sustainable location for housing development which	
			clearly accords with the recommendations set out by	
			the previous Local Plan Inspector. Owing to the sites	
			location and having reviewed the objectives of the	
			South Melton Mowbray Sustainable Neighbourhood	
			as set out in Policy SS4, the site can come forward	
			,	
			now to make an important contribution to the poor	
			housing land supply position in the borough, whilst	
			also ensuring the early delivery of this part of the	
			sustainable neighbourhood.	
			The site is well related to the existing built form. It	
			comprises an infill development and a 'rounding off'	Noted.
			opportunity in a sustainable location with good	
			access to local services and facilities. The site is well	
			contained within the landscape and important trees	
			and other landscape features are retained where	
			possible.	
				Noted Parts of the Molton South SN
			The site itself is not the subject of any formal historic	Noted. Parts of the Melton South SN

or environmental designations and it is not situated	have an impact on the Scheduled
within a conservation area. The Landscape and	Monument. Discussions with Historic
Visual Impact Appraisal (LVIA) submitted with the	England are ongoing.
application demonstrates that the overall landscape	
and visual effects are considered to be	
predominantly localised. The most notable	
landscape effects arise from changes to the	
landscape character of the Site. In visual terms,	
there would be some short term adverse effects	
upon the adjacent residential area, roads and	
footpaths. However, in conclusion, it is assessed that	
the Site has the ability to absorb development of the	
scale and type proposed without causing any	
unacceptable landscape and visual harm. It is	
considered that a high quality urban design solution	
can be delivered on the Site which is in keeping with	
best practice and current Government Guidance and	
which can make a positive contribution to the local	
landscape and townscape.

b. Economic Benefits • Housing	development is a key	Noted.	
component of economic growth	n and this is fully		
recognised in Government police	cy and Ministerial		
guidance. The delivery of a suff	icient quantum of		
housing of the right type, at the	eright time and in the		
right location, is fundamental a	nd as much a part of		

		1	
	the growth agenda as direct economic development.		
	Paragraphs 18 and 19 of the Framework confirm		
	that the Government is committed to securing		
	economic growth and that "significant weight"		
	should be placed on the need to support economic		
	growth through the planning system. • This		
	development will deliver housing in a sustainable		
	location in Melton Mowbray. The benefits		
	associated with employment in the construction		
	industry, the increased local spending associated		
	with a greater population, a greater number of		
	economically active residents and the payment of		
	New Homes Bonus to Melton Borough Council.		
	Therefore, the proposals wholly accord with the		
	NPPF guidance on Economic Development.		
	c. Environmental Benefits • Significant areas of		
	planting to provide green infrastructure, ecology and	Noted. Environmental considerations	
	wildlife benefits. Habitat creation measures to	have been addressed through	
	ensure biodiversity is retained with enhanced	consideration of the determined	
	hedgerows and green corridors. These measures will	planning application.	
	ensure a net biodiversity gain in accordance with		
	requirements of Paragraphs 9 and 118 of the		
	Framework. • Provision of domestic gardens which		
	provide an opportunity to improve biodiversity over		
	and above agricultural use. • The provision (by		
	condition) of a Travel Plan, the payment of the bus		
	subsidy and the site's proximity to key local services		
	and facilities would help to promote more		
	sustainable patterns of travel, mindful of the rural		
	nature of the borough.		
	Therefore, the site is available, achievable and	Noted. Contributions to the delivery

	there is no scheme that is currently designed or		
	costed for the delivery of this infrastructure and this		
	needs to be undertaken as a matter of urgency by		
	the Highways Authority before the Local Plan can		
	proceed to adoption. This is to ensure that, there are		
1	· · · · · · · · · · · · · · · · · · ·		

no significant delays to the implementation of the Local Plan, the Local Plan can be delivered and that schemes can come forward with a proportionate and an appropriate contribution in place for highways and other necessary infrastructure. If this is not undertaken quickly, this could affect the deliverability of the entire local plan causing significant issues for the Council going forward. The Council should be alive to the fact that in order to deliver the transport infrastructure improvements necessary for Melton Mowbray a certain level of development will have to come forward before sufficient funding is in place. This may make the local traffic situation worse in the short term before it can be properly addressed through the new infrastructure and this fact should be expressed within Policy SS4. This position is accepted by both the Borough and County Council as set out in the Cabinet Report included as Appendix 3 to this statement.

Gladman object to the criterion relating to the frequency and location of the bus service serving the site. A 20-minute frequency is acceptable if all of the development came forward in one go, but a 20-minute service is not viable until a certain level of population is already established on the site. There needs to be greater flexibility to make it clear that this criterion should be fulfilled once a certain number of units have been delivered. It is also questioned as to why the distance of 400m has been decided upon for walking distances to a bus stop. There is no evidential justification for this requirement and therefore this should be removed from the Policy.

Gladman also object to the criterion which requires a development that exceeds building regulations for energy efficiency and carbon emissions. The Council cannot set a local standard for energy efficiency above the 2013 Building Regulations Standard. The Deregulation Bill 2015 specifies that Councils cannot set any additional local technical standards relating to the construction, internal layout or performance

It is accepted that a 20 minute frequency bus service during the early stages of development is not likely to be achievable. However, it is important that all parts of the SN contribute to achieving this in a phased way as the development progresses. Other mitigation to help 'public transport habit forming' can be secured in the early stages of development. The 400m walking distance to a bus stop is identified in the 6Cs Highways and Transportation Design Guide.

Noted. The wording should be amended to reflect the Deregulation Act which allows Local Councils to include policies imposing reasonable requirements for—

(a) a proportion of energy used in development in their area to be

Amend the policy wording to 'encourage' developers who wish to exceed current building regulations and energy efficiency standards and for new houses to have x% of their energy from renewable sources and energy efficiency standards that exceed the energy requirements of building regulations.

critical scheme. A Secretary of State decision	
(APP/A0665/A/14/2229269) (Appendix 4) Land off	
Rilshaw Lane, Winsford is particularly pertinent on	
this issue. Para 16 of the Secretary of State's	
Decision Letter states that: 'The appeal relates to	
land which has been allocated for development in	
the Local Plan (LP) and Winsford Neighbourhood	
Plan (WNP) and in general terms is compliant with	
polices therein. The Secretary of State acknowledges	
there is conflict with policies in the development	
plan which seeks an adopted development brief	
prior to granting permission for any scheme within	
the proposed Station Quarter Urban Extension	
(SQUE). However, for the reasons given, he finds	
that the degree of harm caused by allowing this	
appeal in advance of the development brief and in	
conflict with policies in the LP and WNP would be	
very limited. He is satisfied that the appeal scheme	
would not prejudice the achievement of a	
coordinated and sustainable form of development	
within the SQUE; it would bring forward significant

	developer/landowner and wider sessions of the	
	Reference Group where appropriate. Participation in	
	the Reference Group has allowed us to understand	
	key issues and concerns in relation to proposals for	
	development to the south of Melton and to refine	
	our emerging proposals to address concerns.	
	Davidsons Developments Limited and the Town	Noted.
	Estate fully support the Council's proposals for the	
	allocation as set out in Policy SS4. The development	

of a southern extension to the town is a sustainable and deliverable development opportunity. It will facilitate the provision of a new link road from the A606 to the A607 Leicester Road, a key component of the Council's transport strategy for the town, delivering key benefits in terms of traffic relief in the town centre.

Davidsons Developments Limited has been working on a Framework Plan for the South Melton Sustainable Neighbourhood to illustrate how the proposal can be delivered and this is submitted as part of these representations. This work has been supported by a number of technical studies including;

Heritage and Archaeological Assessments by CgMs -Our Heritage consultants CgMs have assessed the potential impacts on heritage interests supporting by a comprehensive geophysical survey of the site. The relationship of the proposed development to the former St Mary and St Lazurus Leper Hospital at Burton Lazars has been a key consideration. Through the location of the proposed development, provision of a robust landscape framework and provision for new interpretive opportunities on land to the south of the development area, it is considered that the less than substantial harm is outweighed by the benefits associated with the development of the sustainable neighbourhood in accordance with paragraph 134 of the National Planning Policy Framework (NPPF);

Transport Assessment by ADC Infrastructure – ADC Infrastructure have been working closely with Leicestershire County Council to undertake further modelling of development options to the south of Melton using the Leicester and Leicestershire Integrated Transport Model (LLITM). This work has helped to inform the development of the transport strategy for the South Melton development option including design of the south Melton Link Road and associated junction improvements and mitigation measures;

Noted. The framework will help to inform more detailed masterplans and detailed planning applications. It may need to be amended to reflect 'environmental' and 'heritage asset' concerns.

The impact of the development on any heritage assets is a key issue. The Council will work closely with Historic England and the developers in order to ensure that proposals do not result in substantial harm to heritage assets including the former St Mary and St Lazurus Leper Hospital at Burton Lazars.

Noted. Transport impacts will need to be fully assessed in order to understand the transport impacts & implications and potential mitigation measures (including phasing). The Council will work closely with the Highway Authority and other interested parties to agree the potential alignment of the relief road.

Flood Risk and Drainage by Weetwood Engineering –	Noted. A strategy to address

for Melton Mowbray through the provision of a southern link road.

The Emerging Options Consultation includes a Concept Map for the Melton South Sustainable Neighbourhood at Figure 6. The Indicative Framework Plan prepared by Davidsons Developments reflects the key principles for the proposed development as outlined in Policy SS4. The Plan at Figure 6 includes an indicative routing for the proposed link road. This shows part of the route linking Kirby Lane with Leicester Road falling within third party land. The Concept Map should be amended to be consistent with the Indicative Framework Plan submitted as part of these representations to ensure that no issues of deliverability arise.

Davidsons are happy to continue working with officers as they work towards the submission draft version of the plan to ensure that the plan and the proposals for a South Melton Sustainable Neighbourhood meet the necessary tests of soundness.

As currently drafted, Policy SS4 sets out a series of environmental expectations, including that the development will exceed building regulations for energy efficiency and carbon emissions where viable. The Council cannot set a local standard for energy efficiency above the current 2013 Building Regulations standard. The Deregulation Act 2015 is clear that no additional local technical standards should be set out in local plans. The Act removed the power of authorities to required residential developments to exceed the energy performance requirements of Building Regulations. The policy as currently draft is therefore contrary national policy and needs to be reviewed. The Options Paper outlines assumed development rates for South Melton at Table 5. This assumes completion rates of 100 dwellings per year, with some 1,700 dwellings delivered within the plan period. The assumed build rates represent a conservative assessment of likely

The concept plan (Figure 6) of the Emerging Options Plan will be updated when the Publication Plan is prepared. This will need to identify a route that is technically deliverable and is acceptable to the Highway Authority and is supported by the evidence.

Noted.

Noted. The wording should be amended to reflect the Deregulation Act which allows Local Councils to include policies imposing reasonable requirements for—

- (a) a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development;
- (c) development in their area to comply with energy efficiency standards that exceed the energy requirements of building regulations.

If the 'Zero carbon' amendments are introduced I advance of production of the publication plan, an energy

Amend the policy wording to 'encourage' developers who wish to exceed current building regulations and energy efficiency standards and for new houses to have x% of their energy from renewable sources and energy efficiency standards that exceed the energy requirements of building regulations.

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

			build rates on the site.		efficiency policy will not be required.	
Burrough Court Estate Limited	BHLF- BHRP- 4HAX- 1	Object	These two policies allocate large scale strategic development (Sustainable Neighbourhoods), which include a high level of large infrastructure development for the Borough. 65% of all planned residential development, totalling 3,500 dwellings, during the plan period will be directed towards the 'Melton Mowbray Main Urban Area'. The principle of strategic growth in the Borough is supported, however this 'putting your eggs in one basket' approach is not supported as this will not deliver much needed homes in a timely fashion as directed by the NPPF. The Borough Council are already unable to demonstrate a five year housing land supply, largely as a result of lack of strategic sites not delivering as anticipated, yet the Borough still wish to pursue this method of housing distribution. The trajectory for the delivery of the housing within these development sites is seriously questioned. An assumption has been made that each of the sites will deliver 100 dwellings per year, based on two developers operating concurrently on each site (50 dwellings each). However Policy SS4 requires delivery of 2,000 dwellings, some 20ha of employment land for a mix of use classes, as well as provision of a new primary school, local centre (including parade of shops, A2-A5 use classes, small scale employment opportunities, and non-retail and community facilities), as well as a strategic road link connecting the A606 to the A607 to form the outer western relief road to Melton Mowbray, a number of new and enhanced bus services as well as important environmental objectives. Policy SS5 is similar in its requirement to deliver 1,500 dwellings, employment land, community facilities, and a strategic road link connecting the A606 to Nottingham Road form the outer western relief road to Melton Mowbray. Both allocations require comprehensive master plans preparing, as part of the requisite planning applications; incorporating all development elements into the masterplan i.e.	Development should be more evenly distributed through the Borough with a variety of settlements accommodating development to meet local housing needs and support the requirements of the Borough. Appropriate housing delivery can be achieved across all settlement categories including 'Rural Settlements' where development is suitable and appropriate, which should not be restricted to such small scale delivery e.g. 3 dwellings or less, when appropriate development, such as 10-15 units may be more appropriate in some settlements, whilst none is appropriate in others.	A range of other options have been assessed through SEA and Sustainability Appraisal. Delivery of large scale growth to the north and south of Melton Mowbray is considered to be the most effective way of delivering the required amount of housing with the necessary infrastructure (including schools, a relief road and other services and facilities. The Publication version of the plan will need to include a robust trajectory that will be tested at examination. Delivery of 100 units per year within the Sustainable Neighbourhoods is considered realistic and has been tested through 'Developer Panels'. The 'lead-in' times and rates of delivery must be realistic and will be based on further discussions with potential developers.	

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

employment, housing etc It is likely that the		
preparation of such work is likely to take at least 12		
months (including survey work), followed by the		
application itself, which, including the S106 legal		
agreement is likely to take a further 18 months.		
Upon receipt of outline planning permission, should		
it be granted, reserved matters applications will		
need to be prepared (a further 6-12 months) with		
determination a further 6 months minimum. This		
process therefore could take a minimum of 4 years		
(on each Sustainable Neighbourhood) before gaining		
detailed permission. That would lead to at least		
2020/21, when the Council have assumed delivery of		
400 dwellings across the two Neighbourhoods.		
Neither site will have delivered any units by this		
stage. As set out above, large infrastructure will		
need to be in place as part of the allocations, relief		
roads, primary schools etc. prior to residential		
development being delivered. Delivery of the		
required infrastructure takes a significant amount of		
time and money. It may even be that residential		
development is not delivered in the period 2021-		
2016 where the council assumes a further 1,000		
units will be delivered.

			housing. By distributing residential development as proposed the delays of delivering the infrastructure required prior to delivering the much need new homes, will only seek to further exacerbate the housing delivery issue within the Borough.		
Brown & Co - Property & Business Consultan ts LLP (on behalf of the landowne rs - M Hill, P Hill, M Hyde & P Pickup)	BHLF- BHRP- 4HA9- 2	Object	Our objection is based on the exclusion of Site MBC/049/13 which would add much needed more sustainable development land to this SUE and in preference to other areas proposed, particularly Melton North SUE and also some of the village development. The number of homes should be increased and in view of the need to make significant contributions to the bypass and other infrastructure needs. The percentage of affordable housing should be reduced. This is a low value housing area and 37% is not achievable. We would suggest the target, which should still be subject to viability, should be reduced.	Change the Policy to reflect the increased number of houses that could be made available, reducing the level of affordable content to a target of say 30% subject to viability and to making it clear that this and other land should be integrated to help produce a more sustainable form of development throughout the Borough and in preference to other sites. Policies should reflect the fact that there needs to be a strategic gap between the development and Burton Lazars and this should be deliverable through the Masterplan and also to produce green infrastructure to help link this and other sites to the existing network. There are already important footpaths and other links through our clients' site which can help produce improved infrastructure uses.	Noted. The site MBC/049 will need to be considered further in light of the potential alignment of the relief road. The site has scored well against some of the Sustainability Appraisal objectives and will be considered along with other options when the Publication version of the plan is progressed. The requirements for affordable housing will be informed by the Leicester and Leicestershire SHMA and viability Assessments and more detailed evidence gathered by the Council in relation to more local housing needs.
Natural England	BHLF- BHRP- 4HA7-Z	Support	We welcome the commitment in paragraph 4.4.6 to incorporate green infrastructure into the development and the commitment in paragraph 4.4.7 to respect the landscape, wildlife and heritage assets of this location. We welcome the following commitments: Protection of the separate identities of Burton Lazars and Eye Kettleby in accordance with policy EN4 and respond to settlement fringe sensitivity in accordance with policy EN1 to create a locally distinctive development and an improved town edge; Protection and enhancement of important areas of bio-diversity (habitats and species); Protection and enhancement of historic and archaeological features; including the St. Mary and St Lazurus hospital scheduled monument and its setting and the line of the former Roman Road at Kirby Lane; Protection and enhancement to the existing		It is proposed to retain the strategic gap between Melton Mowbray and Burton Lazars / Eye Kettleby. The distance separation will be informed through detailed masterplanning. Open spaces, wildlife corridors and functional green spaces will be informed within an emerging masterplan.

Chapter 4: Growing Melton Borough – Spatial strategy - Policy SS4 – Melton Mowbray South Sustainable Neighbourhood

			wildlife corridors and, where appropriate, provide new corridors to create a coherent network of biodiversity and green infrastructure specifically the River Wreake tributaries and the Edendale Brooke; Establish a protection zone between the River Eye SSSI and any future development. Provide a network of new high quality of multifunctional green spaces in accordance with the Council's open space standards set out in policy EN7;	Noted. The policy will be altered in respect of 'housing developments	
			for energy efficiency and carbon emissions, where viable; ② Buildings and spaces which are adaptable to future climatic conditions including extremes of temperature, drought and flooding;	exceeding the Building regulations' in terms of Energy efficiency in order to reflect recent changes in legislation introduced through the Deregulation Act 2015.	
			② Development that provides appropriate sustainable drainage systems and flood alleviation measures and where possible reduces flood risk in downstream areas fully integrated into the Green Infrastructure Strategy, all in accordance with the Melton South site assessment in the Strategic Flood Risk Assessment; ② Protecting and enhancing water quality.	Flooding issues are considered under emerging policy E11. SuDS are considered under EN12.	
			Master planning and delivery We welcome the commitment to a master plan setting out: 1 The distribution and location of proposed land uses; 1 Important environmental features and heritage assets that are to be protected; 2 Areas of green infrastructure and green space (including important strategic green gaps to be protected); and, 2 Areas of new landscaping.	It is important that development of individual sites is within the context of a wider masterplan in order to ensure the co-ordinated delivery of development and associated infrastructure.	
LCC Highways Authority	BHLF- BHRP- 4H7Q- G	Support with observatio ns	- Pg. 40 Para 4.3.5: Opportunities for improvements to the highway network within the town are limited and therefore significant infrastructure such as a MORR is required to support the level of growth outlined in the plan. As 'it is expected that the full route will be delivered in parts' there may be some	Noted. MBC will continue to work with the Highway Authority to deliver transport solutions to support proposed growth.
