

Representation to Melton BC regarding the proposed Noisily Festival 2022 at Terrace Hills Farm, Knipton. I would like to raise the following points on the grounds that this licence should be refused due to the Public Nuisance that would result.

1. Disruption to wildlife. This is an area of importance to wildlife and many species live in these woods, deer, foxes, buzzards and red kites. The sheer number of people and the hours that are proposed will be damaging to the wildlife.
2. Road congestion. The locality is not set up for the intensive use proposed for the festival. The area is primarily served by single track roads which will not be able to facilitate the movement of high traffic volumes. The disruption to local residents in terms of getting to and from work will be huge.

In short the location is completely unsuitable for such an event and will prove to be very costly to the local area in terms of environmental and economic impact.
