

Appendix B : Summary of representations received

Neighbouring development site:

I would like to strongly object to this application as it seriously interferes with the pedestrian crossover we have planning permission for and as you know, we also have a full section 278 legal agreement allowing us to undertake work in the highway. If this application is approved, how do you propose that we fulfil our planning obligation and carry out the work that was recommended as part of our safety audit? As it is, the works that have already been undertaken will mean we have to slightly adapt our proposal.
