Dear Simon,

I am writing this letter in receipt of your letter from the 27th January.

I live in apartment [REDACTED] the George hotel and I can confirm I hear various sounds having my windows directly next to the town centre but the lion is definitely the least of my concerns. I regularly hear intense music from the half moon and many other venues throughout different nights of the week, sometimes you can hear the music from the cutting room, generous briton and tubes.

But I am not affected or disturbed by these noises and have learnt to live alongside them as this should be expected moving into the town centre, these established venues have been here for a long time and anybody moving into the town centre should expect this.

I support the white lion and believe it doesn't only make melton a better place to live but also makes melton a better place for visitors who want to enjoy themselves in a sae environment.

Yours Jimmy Drury
