#### 1 Introduction

When originally enacted, Section 40 of the Natural Environment and Rural Communities (NERC) Act 2006 required that 'every public authority must, in exercising its functions, have regard, as far as is consistent with the proper exercise of those functions, to the purpose of conserving biodiversity'.

The Environment Act 2021 then amended Section 40 of the NERC, to further strengthen the 'duty' placed on local authorities. Planning Practice Guidance for complying with the biodiversity duty, sets out that:

'public authorities who operate in England must consider what they can do to conserve and enhance biodiversity in England. This is the strengthened 'biodiversity duty' that the Environment Act 2021 introduces.

This means that, as a public authority, you must:

- Consider what you can do to conserve and enhance biodiversity.
- Agree policies and specific objectives based on your consideration.
- Act to deliver your policies and achieve your objectives'.

To meet its biodiversity duty public authorities should have completed a 'first consideration' of what action to take for biodiversity by 1st January 2024 and then agree policies and objectives a soon as possible after this date. Agreed actions should then be reconsidered within five years of completion of this 'first consideration' with subsequent rolling reconsiderations at a frequency of no longer than every five years.

Local authorities (excluding parish councils) and local planning authorities must publish a biodiversity report which documents the policies and actions carried out to comply with the biodiversity duty. The end date of your first reporting period should be no later than 1 January 2026. After this, the end date of each reporting period must be within 5 years of the end date of the previous reporting period

#### 2 Initiatives, strategies and policies

Whilst the strengthened biodiversity duty is a relatively new requirement, the Council has a number of existing initiatives, strategies and policies that show how it is, and will continue to, meet the biodiversity duty

The full list of initiatives, strategies and policies are set out in **Table 1**, however a summary list of the overarching documents are set out below:

- Corporate Strategy (2024-2036) sets out the Council's long-term ambitions for the next 12 years and includes the vision statement to be recognised as clean, green, and attractive; well on our way to becoming a net zero borough, to be delivered through specific objectives and actions in the Corporate Delivery Plan (2024-2028).
  - The Melton Local Plan (2011-2036), adopted October 2018, includes a number of objectives and policies that seek to protect and enhance the natural environment and biodiversity within the borough. A partial Local Plan review is underway, including updates to some of these environmental policies.
  - Climate Change Strategy (2024-2036), adopted June 2024, supports tackling climate change alongside protecting and enhancing the natural environment; these issues are co-dependent given biodiversity will suffer from the impacts of climate change, but also has a mitigating effect.

In addition to the above, the Council has an agreement with Leicestershire County Council to provide ecology and biodiversity advice for all relevant development proposals, which includes advice to the Council on Biodiversity Net Gain (BNG) in accordance with mandatory requirements. Furthermore, in collaboration with the Council, the County Council is producing a Local Nature Recovery Strategy (LNRS) for Leicestershire, Leicester and Rutland, which will identify the most valuable areas and priorities for nature recovery alongside wider environmental goals.

The Council manages some parks and green spaces and is delivering a number of key actions to meet the biodiversity duty including tree planting programmes; adopting management and maintenance regimes for our parks and open spaces that are beneficial to biodiversity. Whilst we are planning areas for improving biodiversity in our parks and open spaces it is important to consider what else can be done in order to fulfil the Biodiversity Duty and make Melton Borough more ecologically resilient and wildlife rich.

Table 1

Document / work area	Relevant initiatives / strategies / policies already in place	Summary
Corporate Strategy 2024 - 2027		Cherish and celebrate our villages and rural heritage, delivering on the Rural Capital of Food and maximising investment in our waterways, canals, walkways and green infrastructure  Be recognised as clean, green, and attractive; well on our way to becoming a net zero borough
Corporate Delivery Plan 2024 - 2028	Making the borough cleaner, safer and greener	Develop and implement Country Park Masterplan secure Green Flag Award Establish 'Pride in Place' group to improve environmental quality
	Improving the town centre  Securing the right	Develop and implement a design guide to improve the design, aesthetics and environment of the town centre  Explore opportunities with partners to
	infrastructure to enable sustainable growth	support investment in waterways and green infrastructure
	Ensuring Planning Policy and Development support sustainable growth	Complete Local Plan Review and respond to updated National Planning Policy Framework (NPPF)
	Delivering a net zero borough	Adopt Climate Change Strategy
Local Plan (2011- 2036)	Strategic Objective 19	Reduce the risk of flooding and avoid development in areas prone to flooding.
	Strategic Objective 20	Protect and enhance the natural environment and biodiversity.
	Strategic Objective 22	Protect and manage the use of natural resources and mitigate activities that cause their loss or degradation.
	Strategic Objective 23	Prepare for, limit, and adapt to climate change and promote low carbon development.
	Policy SS3 – Sustainable Communities	In rural settlements outside the main urban area, the Council will seek to protect and enhance existing services and facilities and will support

1	,	
	(unallocated sites)	sustainable development proposals. Specific criteria requires development proposals to respect ecological, heritage and biodiversity features and where appropriate provide mitigation to prevent any potential harm.
	Policy SS4 –	Strategic site policy which requires the
	Melton South	protection and enhancement of
	Sustainable	important areas of biodiversity
	Neighbourhood	(habitats and species).
	(Strategic	`
	Development	
	Location)	
	Policy SS5 –	Strategic site policy which seeks to
	Melton North	retain and mitigate any potential harm
	Sustainable	to biodiversity areas and provide a
	Neighbourhood	coherent biodiversity and green
	racignizoumoud	infrastructure network.
	Policy EN2 –	Policy seeks to achieve net gains for
	Biodiversity and	nature and proactively seek habitat
	Geodiversity	creation as part of new development
	Geodiversity	
		proposals. Development proposals will
		protect and enhance biodiversity,
		ecological networks and geological
		conservation interests throughout the
	Deliev FNO TI	borough and beyond its boundaries.
	Policy EN3 – The	Strategic approach to the delivery,
	Melton Green	protection and enhancement of green
	Infrastructure	infrastructure within the borough. New
	Network	or enhanced green infrastructure
		corridors and assets should make
		provision for biodiversity opportunities,
		including incorporating trees, shrubs
		and other natural features within new
		developments.
	Policy EN4 –	Policy to protect areas of separation to
	Areas of	avoid coalescence, retain highly
	Separation	tranquil landscapes and safeguard
		settlement character.
	Policy EN5 –	Policy to protect designated Local
	Local Green	Green Space, to avoid harm to key
	Space	features, value and functionality, and to
		protect character.
	Policy EN7 –	Seeks to protect existing open space,
	Open Sace, Sport	sport and recreation provision within
	and Recreation	the borough, and provide new or
		enhanced facilities to meet the needs
		associated with new development.
	Policy EN8 –	Overarching policy requiring
	Climate Change	development proposals to demonstrate
<u> </u>		1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

	We are currently reviewing measures to treat and remove an invasive plant located in one of our parks which is contributing to the erosion of a river bank.
	We are in the process of creating a wildflower meadow at Melton Country Park to create an additional habitat.
	We are in the process of drafting an open spaces and play area policy/strategy to help prioritise a scheduled programme of improvements and replacement of equipment across the borough of Melton.
	Developing a programme of environmental community clean up days; developing and implementing the Country Park Masterplan to secure Green Flag Award & establishing a 'Pride in Place' group to improve environmental quality.
Partners	We work in partnership with Friends of the Melton Country Park
	We work in partnership with Melton in Bloom to create planted areas around the town centre.
Corporate Assets	Acquiring and disposal of land

#### 3 Further Action

A Biodiversity Duty Plan will be required to:

- Outline across all functions of the Council, what we are doing and planning to do to conserve and enhance biodiversity
- Form the basis for the Biodiversity Duty Reporting.
- Ensure that we are able to demonstrate how we are meeting the Biodiversity Duty from the policy level through to strategy, processes and practices
- Describe any specific projects that contribute to meeting the Biodiversity Duty
