I raise concerns about the above licensing application, however the time to respond has been very short and the information available very limited although I appreciate that you may have given the required 28 days notice.

I suggest that the event Management plan should be put in place before a license is considered to enable all details to be thoroughly examined and full detailed objections can then be submitted and taken into consideration.

To prevent crime and disorder

Full details of traffic management, emergency routes, parking etc. and operational considerations are required to assess the impact on the area.

Details of the number of buses anticipated, hours of operation, pick up and drop off locations and routes are required. Confirmation that there is to be no camping. Can it be a condition on the license that an approved search policy is put in place and on entry that will be subject to search. Is this for drugs? They also state they will have an alcohol management plan in place to manage drunken behaviour. Is this a condition of the license.

Concerns that anti social behaviour and crime will spread into the locality particularly after the event.

Public safety

The promotor has stated they will have an approved search policy in place and entry will be subject to search. They also state they will have an alcohol management plan in place to manage drunken

behaviour. · Public safety
Full details of traffic management, emergency routes, parking etc. and operational considerations are required to assess the impact on the area.

Details of the number of buses anticipated, hours of operation, pick up and drop off locations and routes are required. Confirmation that there is to be no camping.

· To prevent public nuisance

Full details of traffic management, emergency routes, parking etc. and operational considerations are required to assess the impact on the area.

Details of the number of buses anticipated, hours of operation, pick up and drop off locations and routes are required. Confirmation that there is to be no camping.

Concerns re anti social behaviour spreading into the locality particularly before and after the event.

· To protect children from harm

Full details of traffic management, emergency routes, parking etc. and operational considerations are required to assess the impact on the area.

Details of the number of buses anticipated, hours of operation, pick up and drop off locations and routes are required. Confirmation that there is to be no camping.

Concerns regarding drug taking and spreading out in to the neighbouring

villages.

Sorry this is a bit disjointed but I only got the information when I came in this evening.
